Semi-Recessed PPE Dispensing System

Installation Instructions/Characteristics & Care

Installation

Always mount dispensers securely *prior* to loading with product.

Parts included:

Dispenser

• 1 Key

Tools Required:

No tools required to assemble dispenser

Characteristics & Care Powder-Coated Steel

Material Characteristics

Designed for Long-Term Use

Our steel dispensers and stands are coated with polyester powders which makes them highly resistant to corrosion.

Powder-coated steel is ideal for dispensers used in a healthcare or an industrial setting because it is impact resistant and is not affected by extremes in temperature.

Dispensers and stands made of powder-coated steel are both attractive and functional, providing years of service.

Care and Cleaning

For best results, clean by washing the surface with a diluted solution of a mild, non-abrasive detergent in cold or warm water and a non-abrasive cloth. Standard hospital cleaning supplies can be used.

Dry with a soft cloth. Do not use any solvent-based materials, abrasives (e.g. Scotch-brite, steel wool), or apply excessive force during cleaning.
