CONEINSTRUMENTS.COM

TWO BRANDS. ONE GOAL.

Provide Exceptional Products & Service for Medical Imaging Professionals

As part of the Marketlab family, Cone Instruments and Newmatic Medical provide medical imaging professionals with unique, thoughtful solutions to help solve their everyday challenges. Cone is a trusted source for Radiology, Ultrasound, and Nuclear Medicine Departments. Newmatic Medical's specialty focuses on the unique needs for the MRI Department. Between us, we have every modality of medical imaging covered, so you can rest assured we have what you need.

Trust the Cone Brand
Top-quality products at low prices. When you choose Cone, you're choosing the best in imaging. Our products span all modalities, so you're sure to find a solution to meet your needs.

New Products
The newest, most-innovative products handpicked by our product managers and designed to make procedures easier for you and your patients

Latex Free
Indicates products that are latex free, or, by definition, not made with natural rubber latex

Prescription Devices
Items marked with this symbol are considered prescription devices, and you will be required to supply us with documentation to meet applicable laws and regulations

Same Day Shipping
Hundreds of products ship the same day when ordered by 5:30 pm EST.

ZAP
Watch it come to life!

MR Conditional
An item that has been demonstrated to pose no known hazards in a specified MR environment with specified conditions of use.

MR Safe
Applied to an item that poses no known hazards in all MR environments, such as nonconducting, nonmagnetic items.

MR Unsafe
Any item that is a known threat or poses a hazard in all MR environments. It is not safe in ANY MR environment.

Intermediate-Level Disinfectant Helps Cut Reprocessing Time in Half

- Proprietary chlorine dioxide (CIO_2) foam formula
- 2-minute contact time significantly reduces reprocessing time
- Effective against bloodborne pathogens
- Breaks down Deoxyribonucleic Acid (DNA) and Ribonucleic Acid (RNA)
- Alcohol- and bleach-free
- Two-part, on-demand delivery system for fresh and consistent dose with every pump
- Compact design is small enough to fit in lab coat pocket
- EPA-approved

ITEM	DESCRIPTION	UOM	$
CN104703	Tristel™ DUO Intermediate-Level Disinfectant 250mL Pump Bottle	6/pk	$279.00

Keeps Feet in Desired Position for CT Scan

- Radiolucent
- Lightweight
- Constructed of sturdy ABS rigid plastic
- Includes roll of hook & loop tape to secure patient's feet
- Additional replacement rolls of hook & loop available (see 2033222)

Quickly Position Patients for Virtually Any Procedure

Scan-Bands Scan-Track System

- Scan-Track Channel installs onto the imaging table, allowing Scan-Bands to easily attach and slide along the length of the track
- Provides uninterrupted travel of Scan-Bands down the length of the scanner
- Fast positioning and superior patient support
- Ideal for accommodating different studies
- Increases technologists' positioning capabilities
- Optimizes patient positioning to improve comfort during immobilization
- Utilizes the otherwise idle space along the outer edge of the scanner
- Attach to the table pad's existing hook or loop adhesive tape
- Scan-Bands sold separately

ITEM	DESCRIPTION	UOM	$
Scan-Bands® Scan-Track™ System			
CN105597	72"L	1ea	$403.00

Scan-Bands for Scan-Track

- Designed for use with the Scan-Track
- Bands keep patients safely positioned on imaging tables
- High-quality antimicrobial material
- Adjust to create a secure, comfortable fit
- Cleans easily

*Left and right band set uses the existing Hook and Loop strip that is attached to the table. The opposite band set should be ordered (for example, your table has "hook" strips so the "loop" Scan-Bands should be ordered).

**Left and right band set uses the existing adhesive tape along the length of the cradle and attaches with a Hook and Loop closure

Reliable Stabilization of CT Patients

Designed as the first completely hook-and-loop-free belt system, ProBelt allows for hygienic fixation of patients on the CT. The ProBelt system is compatible with virtually all of the CT tables of all common equipment manufacturers using different rail adapters.

- Safe to disinfect, even with 90% alcohol
- Durable, hard-wearing materials provide strong immobilization, even with uncooperative patients
- Quick and easy to use with a rail adapter to move the ProBelt into the correct position
- Simple, intuitive closing mechanism
- Compatible with virtually all common manufacturers' CT tables

High Quality Ultrasound Gel Packaged For Specialized Procedures

Trial samples available — call today

Bubble-free, high-viscosity ClearWave Gel is packaged in a convenient syringe that allows for alternative uses that aren't compatible with other packaging options. The included conical luer-lock adapter combined with a standard enema tip makes the Syringe ideal for gel-based contrast administration in MRI rectal and vaginal imaging procedures.

- Gel-dispensing alternative that's safer and more convenient than standard dispensers
- High-viscosity gel
- High-quality, bubble-free gel
- Conical luer-lock adapter is compatible with most standard enema tips and can be used for MRI colorectal contrast

ITEM	DESCRIPTION	UOM	$
CN102412	ClearWave Gel Syringe • 50mL • Nonsterile	20/pk	$168.00

## The most environmentally friendly gel on the market

The Only Paraben and Propylene Glycol Free Ultrasound Gel

- Scent- and dye-free Gel is produced from 97.8% natural ingredients and is water soluble
- Flexible packaging reduces gel waste by up to 14% over traditional packaging
- FDA approved and prop 65 compliant with Kosher and Halal religious certification for quality
- Quick, easy cleanup with no sticky residue

Keep Those X-ray Aprons Disinfected

- Kills 99.99% of bacteria, viruses, molds and fungi, including MRSA, E. coli, and Norovirus
- One-step hospital disinfectant
- Effective against a broad spectrum of bacteria
- Eliminates odor-causing bacteria when used as directed
- Bleach free, phosphate free, fragrance free, non-flammable, non-toxic, non-corrosive, and requires no special protection to use
- Safe, may be used in the presence of food
- Will not harm metal snaps or components like water, peroxide, bleach, or alcohol-based products
- Aprons can be air dried — no need to be wiped dry

Probe Covers

Cone has the widest selection of probe covers to optimally support all your ultrasound needs, including general purpose, endocavity, sterile and nonsterile, and both latex and latex-free covers.

Add gel

Insert probe

Invert cover. Simultaneously pull down on tab and pull up on probe!

It's the ultimate, easy-to-use, time-saving innovation.

Try the Pull Up™ once and you'll be hooked.

These innovative Pull Up™ Ultrasound Probe Covers allow for convenient loading of an ultrasound probe into a long, sterile probe cover. A unique design makes it easy for users to quickly find the open end of the probe cover. Simply place the desired amount of gel inside, precisely position the probe into the end, and effortlessly pull the cover over the probe and probe cable.

Protect Ultrasound Probes and Minimize Cross-Contamination

- Provides protection from cross-contamination
- Helps protect expensive ultrasound probes
- Minimizes cleanup by allowing the user to add gel only where necessary
- Saves more time than with conventional covers that require assembly during procedure
- General purpose, telescopic fold, and sterile
- Includes sterile gel and bands

ITEM	DESCRIPTION	UOM	$
	Pull Up™ Ultrasound Probe Cover Set

934468	5.5"W x 48"L	24/pk	$270.00

Pull Up Probe Cover Sets
- One Pull Up™ cover
- One sterile gel pack
- Two elastic fasteners

LATEX FREE

Each set is enclosed in sterile packaging

Achieve Critical Performance with the Right Probe Cover

Selecting the right probe cover helps reduce cross-contamination, decrease procedure prep time, and maintain a sterile field.

Trust the Cone Brand

When you choose Cone, you're choosing the best in imaging at an exceptional value. Our products span all modalities, so you're sure to find a solution to meet your needs. Look for the Cone Instruments brand for the best option in every category.

Cone Has a Cover That Meets Your Needs

- Latex-free covers eliminate the potential for common allergic reactions
- Pregelled covers eliminate the time and mess associated with adding gel
- Probe cover packs containing a cover, gel pack, and elastic bands are perfect for portable ultrasound applications and sterile procedures
- Polyurethane, CIV-Flex, and Neo-Guard™ covers provide a soft, comfortable feel with scanning properties similar to human tissue
- Polyethylene covers are cost effective and latex free

- Telescopically folded probe covers are easy to gel and pull on, making them especially useful for longer probes
- Covers 48" and longer are ideal for extending the sterility over the length of the transducer cable
- Bulk packaging is an economical alternative to individually wrapped probe covers and are excellent for routine, nonsterile procedures
- Covers just larger than your transducer create a snug fit when combined with elastic bands to prevent gel migration from the crystals and reduce image degradation

Call today and a friendly, knowledgeable rep will help you find the right probe cover for every procedure in your department.

800.321.6964

Designed specifically to easily slide over probes and provide distortion-free imaging during ultrasounds, these covers are recommended for latex-sensitive patients and professionals and are popular for OB/GYN and sterile scanning procedures.

- Soft, stretchable material is comfortable for patients
- Each box includes sterile gel and elastic bands for 24 procedures
- Contains a specially formulated material with scanning properties similar to human tissue

CONE BRAND

NEW

Premium Gel. Clear Value.

ClearWave Ultrasound Gel is a superior cost-effective couplant designed to meet the most demanding requirements.

- Premium, high-quality water-soluble gel
- Proprietary production method ensures gel is virtually free of micro-bubbles to reduce image artifact and improve transducer coupling
- Consistent viscosity proven in clinical trials
- Low-density, easy-to-squeeze poly bottles aid in dispensing and reduce waste
- Reduce risk of cross-contamination with built-in "check valve" opening and flip-top cap
- Five-year shelf life

Sonographer Stool Increases Comfort and Range of Motion

Black	Ocean Blue
Burgundy	Feather Gray

Don't sacrifice comfort or personal safety to obtain the optimal image. The Ergonomic Chair allows the sonographer to bend, stretch, and move more freely between the exam table and the imaging system—while providing additional support to reduce the stress of repetitive motion. It reduces fatigue with additional support whether sitting forward, sideways, or backwards—and still allows the maintenance of a wide reach.

- Contoured saddle-style seat
- Adjustable seat allows for increased flexibility, range of motion, and reach
- Sit in the reverse position in the chair for increased ergonomic benefits
- Five-star base with wheels and sloping footplates to enhance stability and mobility
- Assembly required
- 250lb weight capacity
- Height adjusts from 22.5"–32"
- Ten-year warranty

Safely Transport Probes and Minimize Cross-Contamination

CN41235 Probe Transport Tray
- Four trays
- Four lids
- Four "Clean" labels
- Four "Soiled" labels

CN40154 shown with CN41235

- Protect patients and personnel from cross-contamination
- Addresses Joint Commission and other infection-control regulations
- Convenient tracking of clean and dirty probes
- Compatible with most endocavity probes
- One continuous piece of plastic for superior durability and minimized infection risks
- Cleans easily with hospital-grade disinfectants including diluted bleach
- Divider isolates the probe from the cord and plug

The Probe Transport System You've Been Asking For

SOILED

A Safe and Secure Way to Transport Endoscopes and TEE Probes

- Fits most TEE probes and endoscopes, even up to 4' long
- Eliminates cross-contamination between the probe/scope and people
- Once cleaned, it prevents potential recontamination
- Isolates the probe from the plug and cable to prevent over coiling
- Included labels allow for accurate identification of dirty and clean endoscopes or probes
- Long lip makes for comfortable carrying
- Transparent lid for superior content management
- High-impact, lightweight polystyrene
- Nests with others, or stacks with lids on
- Tabbed lid snaps into the tray to increase security

The Only Single Probe Storage Cabinet

With options ranging from multi-probe cabinets to single probe holders with open designs that encourage cross-contamination risks, it's difficult to find superior storage when you only need to store one probe. Designed to conform to probe-storage regulations, this innovative Cone Cabinet offers optimal single-probe storage and security in a compact design. Four integrated air vents eliminate mold and bacteria buildup, while the rugged, easy-to-clean cabinet has a keyed lock for additional security.

- Compact design fits comfortably in tight spaces on walls (hardware not included)
- Keyed lock protects probes and prevents tampering
- Four integrated air vents allow for circulation
- Rugged polycarbonate door is transparent for ease of content management
- Designed to keep cords in place and prevent tangling or damage
- Custom molded probe and plug holders
- Compatible with virtually all probes
- Polyethylene cabinet resists most chemicals
- Clean with hospital-grade disinfectants

936338

Tough on Pathogens. Safe on Surfaces. Big on Convenience.

- Alcohol-free formula ideal for disinfecting ultrasound transducers, probes, and mammography compressor plates
- One-step cleaner/disinfectant for use on ultrasound transducers, probes, and hard, nonporous surfaces
- Meets AOAC efficiency standards for hospital disinfectants
- Kills more than 30 pathogens including HIV, H1N1, and MRSA
- Effective on nonporous surfaces made of laminate, metal, plastic, stainless steel, and vinyl
- No aroma

- **Staphylocidal**
- **Pseudomonacidal**
- **Bactericidal**
- **Salmonellacidal**
- **Fungicidal**
- **Virucidal**
- **No aroma**

Clorox® Germicidal Bleach

- 8.25% sodium hypochlorite formula is more concentrated than many other bleach products
- Using 1:10 dilution ratio, it exceeds the 5,000ppm required to kill most pathogens
- Complies with OSHA guidelines for bloodborne pathogens
- Higher concentration and super-filtration processes ensure long shelf life

ITEM	DESCRIPTION	UOM	$
CN15059	Ultra Clorox Germicidal Bleach 121oz	1ea	$35.00

Wipes Kill 47 Pathogens Without Damaging Equipment

Designed by ultrasound engineers and sonographers, SONO Ultrasound Wipes are the only disinfectant wipes that use an EPA approved proprietary patented solution that kills 47 pathogens and have been tested to prevent damage to your equipment. Eliminating the need for multiple cleaning products, these innovative Wipes clean, sanitize, disinfect, and deodorize everything they touch.

CN23486 Innovative canister designed for superior disinfectant retention

- Kills 47 pathogens including MRSA, HIV, Staphylococcus, and the 2013 influenza A virus (H7N9)
- Won't damage cables or lenses
- Safe to handle without gloves
- Safe on touchscreens and system consoles

180 perforated holes

Specimen TranSpec Device

- Permits accurate x-ray and identification of noncalcified lesions and micro-calcifications
- Includes x-ray-visible number/letter axes on the compression plate that allows for exact location of the lesion in the gross surgical tissue
- Holes in the perforated compression plate enable needles or other markers to be inserted into the tissue for extremely precise pinpointing of micro-calcifications
- Housed in a waterproof container

ITEM	DESCRIPTION	UOM	$
	TranSpec™ Device		
204553	With Perforated Compression Plate	10/pk	$514.00
	TransSpec™ Device		
204554	With Solid Compression Plate	10/pk	498.00

Mammography Specimen Devices

Specboard protects personnel from body fluids and the device is discarded after use. Accurate localization of pathology within the excised specimen is possible utilizing the radiopaque grid inside the device.

- Tighten the front closure and backboards for specimen compression
- The Specboard Jr is designed for 100mm x 100mm (4" x 4") digital (DR) x-ray applications (Bioptics, Faxitron, Kubtec, etc.)
- Comes complete with separate diagram to pinpoint the excised area relative to the patient
- Sealed within a resealable plastic bag

ITEM	DESCRIPTION	UOM	$
225201	Specboard Jr	10/pk	$313.00
225200	Specboard	10/pk	313.00

One Device Does it All!
Surgery - Radiology - Pathology - Storage

All-in-One, Cost-Effective Surgical Specimen Container

- Radiopaque alphanumeric grid lines facilitate lesion localization via coordinates
- Larger grid openings allow localization needle to remain in place if grid is removed
- Patent-pending removable alphanumeric compression grid can adjust amount of compression and enables stabilization
- Watertight top prevents biohazardous spills
- Nonsterile and single use

ITEM	DESCRIPTION	UOM	$
CN16515	PathProof Breast Biopsy Specimen Container	12/pk	$245.00

2View Specimen Mammography Container

- Square shape guarantees two 90° orthogonal views, necessary to evaluate all six margins
- Retain any size specimen with minimal compression
- Integrated radio-opaque grid can be used to reference areas of concern to either the surgeon or the pathologist
- Transparent body allows surgeons to assess the orientation and retention of the specimen before it leaves the OR
- Snap-fit lid and foam-rubber retainers eliminate body-fluid exposure

ITEM	DESCRIPTION	UOM	$
247200	Specimen Mammography Container	12/pk	$539.00

BIODEX

The Industry Standard in Ultrasound and Imaging Tables

Biodex Ultra Pro Table

CT Slickers Covers and Cushions for CT

Slickers® are available for most CT systems, the most common are listed here. If you don't see what you need, please call for details on protecting your CT system and patients with Slickers®.

- Clear vinyl protective cover systems encapsulate the table cushion
- Slickers flaps simplify cleanup, allow for more thorough disinfection, and keep contaminants from penetrating into the table's electro-mechanical components
- Reduces exposure to blood and fluid
- Flaps and skirts (where used) help protect table rails and edges from stretcher wear and tear

One CT Positioning Device. Multiple Benefits.

The Arms-Up positioning device allows your patients to be more comfortable and receive less radiation. No more loosely supported build up of pillows, risk of IV failure, or shoulder pain—Arms-Up improves patient comfort and outcomes.

- 40° tilting bar accommodates different gantries and exams
- Removable ergonomic pillow
- Pillow keeps chins out of the lung field to eliminate dental artifacts
- Dual height bar accommodates different patient sizes
- Strap to table or use patient's weight to hold device in place

ITEM	DESCRIPTION	UOM	$
CN18700	Arms-Up CT Positioner	1ea	$762.00

Not compatible with the GE Revolution 256, Toshiba Aquilion One, or Siemens Force scanners
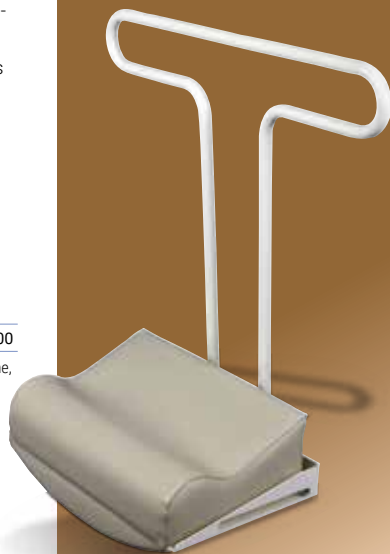

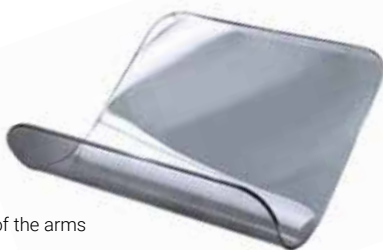

Improve the CT Scan Experience!

- Reduce radiation dose
- Increase patient comfort
- Maintain IV integrity
- Improve image quality

Support Patients' Arms in Prone or Supine Positions

- Eliminates the use of tape, tie-downs, and straps without obstructing the physician
- Offers an unobstructed view of the arms

Patient-Friendly Pedia-Poser for X-ray Imaging

- Minimizes the need for retakes, reducing radiation exposure and saving time and money
- Chair rotates, positioning for different views
- Adjustable back and head-tilt support
- Polyethylene chair components are x-ray lucent for excellent x-ray contrast
- Saddle horn supports a genital lead shield
- Nonporous polyethylene is easy to clean
- Lockable casters
- Views: C-Spine (AP, Lateral, Oblique), Chest (AP, Lateral), Abdominal (AP), Magnified Airway (AP, Lateral), Standing Lower Extremities (AP)

Coated Patient Positioners

LATEX FREE

High-density polyurethane foam has a soft texture for optimal patient support and comfort, and the flame-resistant positioners meet the California 2015 Technical Bulletin #117-2013 standards.

- Coated light-green Stealth-Cote polyurethane foam
- Proprietary mixed medical-grade coating creates a unique skin membrane that's durable and easy to clean
- Surface is resistant to blood, Betadine, barium, alcohol, oils, and fluids
- Antimicrobial and antifungal
- Low attenuation (0.1mm Al @ 90kVp)
- Coated design helps prevent contamination

Take X-rays from Virtually Any Angle

Flexi-holder 410 is remarkably versatile, allowing x-rays to be taken at virtually any angle from floor level to 71" high. It rolls or swivels into position on large casters, tilts the cassette 180°, rotates the cassette 360° vertically or horizontally, and telescopes 26"+ over the x-ray or operating-room table.

- Telescoping arm is counterweighted for convenient raising and lowering
- Accepts virtually any type or size cassette
- Does not obscure the cassette film area

ITEM	DESCRIPTION	UOM	$
118101	Mobile Flexi-holder 303	1ea	$3996.00
118103	Flexi-holder Multiangle Film Cassette Holder CR/DR	1ea	4510.00

Tri-Handle Encasement Provides Superior DR Panel and Grid Protection

- Three ergonomic handles allow the radiographer to position easily and provide additional drop protection
- Encasement protects both the grid and DR panel from any incidental damage that may occur during exams
- Accommodates virtually any manual 14"W x 17"L wireless DR panel
- Air-Ride™ corner pocket suspension creates an air cushion to protect the detector when dropped

ITEM	DESCRIPTION	UOM	$

DR Panel Protector

This innovative DR Panel Protector allows user to take weight-bearing x-rays of feet (AP view). Simply position the DR panel on the floor, then place the unit over it. The Protector works with most DR systems including those offered by Canon, Siemens, GE Healthcare, Philips, Shimadzu, Quantum, and Trixell.

- X-ray lucent faceplate
- High-impact-resistant polycarbonate faceplate
- 750lb weight capacity
- Nonslip rubber floor grips
- Nonporous polyethylene and polycarbonate are easy to clean
- Frame is notched to accommodate the cable connection from the digital DR system to the host panel

It's Better To Be Safe Than Sorry

Though manufacturers may indicate a panel can accept a patient standing on it during a weight-bearing x-ray of feet, do you really want to risk breaking it and having to pay expensive repair or replacement costs?

Simple, Reliable, and Virtually Indestructible CR Cassette Protector

- Optimal positioning for weight-bearing AP foot images
- Unbreakable polycarbonate faceplate supports up to 750lb
- Keeps patient's foot as close to the target image platform as possible to ensure high-quality images with no significant magnification
- X-ray-lucent faceplate allows the x-rays to pass through with very little absorption or scattering

Bucky Protector

The Bucky Protector is an affordable way to shield your bucky faceplate from scratches, dings, and punctures that may occur. Simple to attach, the Protector is easy to clean and has no significant scattering or absorption.

- Reduces wear and tear
- High-impact-resistant polycarbonate
- Industrial Velcro
- Clear images with no significant scattering or absorption

ITEM	DESCRIPTION	UOM	$
CN40100	X-Ray Bucky Protector • 19"W x 19"L	1ea	$114.00

X-Ray Stitching Stand

- Provides correct patient positioning for x-ray stitching procedures
- Ideal for most x-ray systems
- Heavy-duty metal frame
- Adjustable patient arm rests
- Clear Plexiglas backing
- Rollers with mechanical stops allow for convenient movement on hard flooring
- Not intended for weight-bearing procedures

ITEM	DESCRIPTION	UOM	$
CN43611	Z-Stand • X-Ray Stitching Stand 32"W x 33.5"L x 79"H	1ea	$4697.00
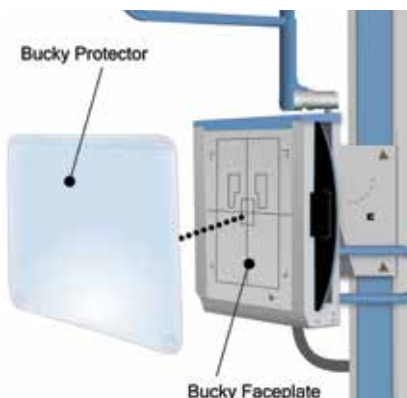

New Design!
Obtain Multiple Views Without Relocating the Patient

- Obtain weight-bearing A/P, lateral, and other anatomical views
- Helps minimize patient movement
- 500lb weight capacity
- Two grab bars for patient safety and reduced fall risks
- Four imaging panel placement locations for versatility in posing the patient
- Portable with built-in rollers and grab bars
- Nonporous material cleans easily

Noise Guard Headset 29dB

This earmuff headset fits comfortably and securely over the ears, providing a full 29dB Noise Reduction Rating (NRR) to patients during their scan. Soft latex-free muffs are comfortable for patients to wear for extended periods of time and may be used with Large Sanitary Covers for easy cleanability. Tested according to ANSI standards, this headset offers the maximum attenuation available to patients in the MRI environment.

- Ear muff-style headset
- Tested at NRR 29dB
- Compatible with our Large Sanitary Covers

ITEM	DESCRIPTION	UOM	$
NGHS29	Noise Guard Headset 29dB	1ea	$542.00
NCNG29	No Cord Noise Guard Headset 29dB	1ea	114.00

Non-Headset

The Non-Headset is designed for the tightest of head coils providing music and communication to the patient during their scan without the use of an actual headset. The Non-Headset has two 1" foam ear muffs which can be positioned right up to the patient's ear in the head coil compressing down to 0.5" but has no headband allowing use in almost any situation. It is not intended or rated to reduce noise and therefore must be used in conjunction with earplugs with a minimum NRR rating of 29 in order to be ANSI compliant.

- Foam ear muffs compress to just 0.5" to allow for use in head coil
- Provides music and communication to patient without use of actual headset
- Not rated for noise reduction; must be used with earplugs rated at NRR 29dB
- Includes one male connector and 4' of tubing

No-Cord
Headset

SNGHS
Slimline Noise
Guard Headset

Slimline Noise Guard Headset

- Fits into most head coils
- Provides 12dB of noise attenuation; must be used with earplugs to reach 29dB attenuation
- Corded version is compatible with most sound systems
- Cordless version provides noise protection only
- Standard male connector

ITEM	DESCRIPTION	UOM	$
SNGHS	Slimline Noise Guard Headset	1ea	$445.00
NCSNGHS	No-Cord Slimline Noise Guard Headset	1ea	127.00

Compliant 30dB Coil Headset

This truly unique headset system features an enhanced and patented design that creates a better fit in tighter coils. Works in conjunction with our unique coil headset plugs that utilizes a pneumatic port to transfer music or speech directly into patients' ear canals while providing 30dB of gradient noise attenuation.

- Uniquely designed for comfort and fit within all coils
- 30dB NRR attenuation both complies with and exceeds ANSI standard minimum requirement of 29dB NRR
- Plugs roll up, insert easily, and are disposable to eliminate sanitary concerns

The Best Sound System for MRI

The high-quality, value-engineered Newmatic MRI Sound System you know and love is now better than ever. Combining the classic design with improved technology, Newmatic is enhancing the MRI experience for both patients and technologists. Designed so that patients and technologists can listen to different music sources at the same time, the System also has dual active headsets that allow patients and companions to both listen to instructions or music.

- Reengineered, improved patient amplifier with AM/FM tuner
- Allows patients and technologists to listen to different music sources at the same time
- Headset has 10' tubing that directly plugs into the transducer for a superior listening experience and enhanced comfort
- Nonheadset is designed for the tightest head coils and can be used in conjunction with earplugs to reach the required 29db NRR
- Nonheadset has two 1" foam ear muffs that can be positioned right up to patients' ears in the head coil, doubling as a positioning aid
- Dual active headsets allow both patients and companions to wear headsets and listen to the same source
- Helps reduce anxiety during MRI scans and improve overall patient satisfaction
- iPad mini comes ready for use, preloaded with music apps and an album
- RF filters help ensure artifact-free scanning
- Easy to install, especially when updating an older Newmatic Medical MRI Full Sound System
- Compatible with other tablets and smartphones
- One-year warranty

The Complete Wheelchair Selection to Transport Every Patient

Specifically designed for use in the MRI suite, these chairs are MR-conditional to 3-Tesla. Available with load capacities ranging from 250–550lb. Each chair features a storage pocket on the back of the forest green embossed upholstery. Accessories and replacement parts are available.

- Durable, lightweight 18-gauge 304-grade stainless steel
- Lightweight 24" diameter wheels with bearings provide smooth ride
- 8" front casters with precision bearings
- Retractable wheel locks
- Quick-release safety belt
- Rust-proof hand rims and black side panels
- One-year warranty on upholstery and metal components under normal use
- Five-year warranty on frame under normal use

MR Transport Gurney with Optional Hand Crank

This transport gurney boasts a generous 600lb weight capacity and convenient 22" x 31" storage tray below. The manual crank feature allows the operator to easily raise and lower the fowler backrest, adjusting from 0°–75°, alleviating the potential for back and hand injuries while trying to manually lift or lower a bariatric patient. Nonmagnetic, stainless-steel construction makes it ideal for MRI. Comes standard with four 4.75" locking casters, grounding chain, storage tray, and forest green 2.5" pad. Nonmarring bumper protects on all sides. Flip-down side rails provide easy accessibility. Optional IV pole and O$_2$ holder also available. MR Conditional to 3-Tesla.

- Nonmagnetic stainless steel
- Fowler backrest adjusts from 0°–75°
- Available with or without hand crank
- 2.5" thick pad is 77"L x 23"W
- Load capacity: 600lb
- Flip-down side rails

The Only Ferromagnetic Detector Suitable for the MRI Room

- Dual-sensing capabilities for separately screening either ferrous metallic items or any type of metallic item
- Nonmagnetic construction is ideal for operation in Zone IV
- Three modes of operation: high-performance ferrous only, detection around the head and body, or full metal detection around the entire body
- Large search area for quick, accurate screening
- Dual-tone and dual-color display for high-precision pinpointing
- Mitigates the risk of an RF burn occurring in the scanner due to Ferrous or nonferrous metals
- Audible and visual-magnitude alert settings
- Visual signaling combined with the audio provide feedback on the location and position of the object under alarm
- Battery life: >100 hours for all metals; >50 hours for body or head
- MR conditional to 3 Tesla

ITEM	DESCRIPTION	PK	$

Handheld Metal Detector

- Three modes of operation allow for high-performance ferrous only detection around the head and body or full metal detection around the body
- Capable of separately screening for both ferrous and nonferrous metallic items
- Eliminates risks of dislocation, torsion, overheating, or induction of electrical current
- Audible, silent-vibration, and visual-magnitude alert settings

| ITEM	DESCRIPTION	PK	$
NM27334	PD240CH Handheld Metal Detector	1ea	$7168.00

Highly Sensitive, Convenient Ceia Ferromagnetic Detectors

- Preventive detection of ferromagnetic and magnetized object that may cause a "projectile effect" in MRI rooms
- Accurate localization with multizone acoustic and optical alarm signaling
- Durable stainless-steel and high-impact reinforced plastics
- Passive detection with no field emissions
- Record up to 70,000 locally with traceability of the alarms, programming modifications, and diagnostics

Ceia Wall Mounted Ferromagnetic Detector

Includes:
- Mounting bracket
- Ethernet cable
- Patient screening mat (97043 only)

Refined Quality Assurance Tools for Advanced Imaging Systems

Keep your facility's equipment calibrated, and pass daily quality assurance tests. Ensure your imaging systems' hardware and software are running at optimal levels and within federal regulations.

ACR MRI Phantom

The ACR MRI Phantom is an 8" (203.2 mm) diameter cylinder, 6.82" (173.40 mm) tall with various fixtures inside, including a plate, cylinders, and other points of interest. Marked with reference points for nose and chin. The Phantom is approved by the American College of Radiology and is compatible with the ACR Phantom Cradles.

- Approved by American College of Radiology and for Joint Commission Accreditation use
- Reference points for nose and chin
- Compatible with all of our Phantom Cradles
- Includes small all-plastic level

ITEM	DESCRIPTION	PK	$
ACRMRP	ACR MRI Phantom	1ea	$2631.00

NEW

Address the QA Needs Requiring Medium-Sized Phantom

The Medium ACR MRI phantom was approved for accreditation in mid-2021. It has a 7" diameter cylinder, 6.125" cylinder length, with various fixtures inside including a dinosaur, drilled plate, membrane stack, ramp, resolution block, and S-N chamber. This newly available size enables the capture of images for MRI accreditation and quality control (QC) with the same coil that is used to acquire most clinical brain images. The medium phantom eliminates the extra handling of MR coils in order to conduct required technologist QC.

- Approved by American College of Radiology
- Reference points for nose and chin
- Compatible with all of our Phantom Cradles
- MR conditional to 3 Tesla

ITEM	DESCRIPTION	PK	$
NM104683	MRI ACR Phantom, Medium	1ea	$2572.00

ACR MRI Phantom for Smaller Machines

The Small ACR MRI Phantom is a short, hollow cylinder of acrylic plastic closed at both ends. The inside length and inside diameter are both 100mm. It is filled with a solution of nickel chloride and sodium chloride.

- Designed for use in small machines, such as those for extremity and breast imaging
- Approved by American College of Radiology
- 4.5" diameter; 4.5" cylinder length; 5.375" overall length with mounting bars
- Includes small, all-plastic level
- Does not require a phantom cradle; fits most standard knee coils

ITEM	DESCRIPTION	PK	$
NM12951	Small ACR MRI Phantom with All-Plastic Level • 4.5"Dia	1ea	$2032.00

Phantom Refill Set

Got bubbles? The Refill Set for the ACR phantom includes everything you need to easily remove air bubbles and top off the ACR phantom. This saves you time and money by eliminating expensive overnight shipping costs to ship the phantom back and forth, and the cost of a "top off" service fee. The Refill Set allows for multiple uses so you have a troublefree solution the next time your phantom gets an air bubble.

ITEM	DESCRIPTION	PK	$
