TEMP INDICATORS

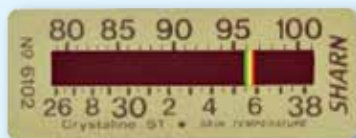

Preferred
by pain
management
specialists

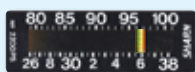

Perfusion Monitors

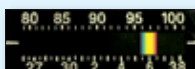

- Temperature indicators read and display skin temperature
- Ideal for Pain Management Departments
- Use when doing EMGs or to diagnose RSD
- Useful for assessing the effectiveness of nerve blocks by watching for a sympathetic rise in temperature
- Quantify your block

Making Sure You Have All the Crystalline® Temperature Trend

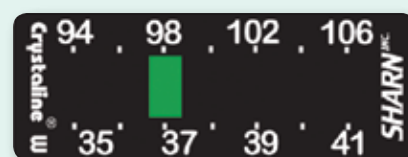

Proven on over 70 million patients.

When it comes to temperature, often all you need is trend. Stick with the leader, stick with Sharn. In today's healthcare environment, temp indicators are an important part of every temp management program, meeting key performance goals:

- **Patient Safety** – one device, one patient, and improved continuity of monitoring, pre-op to post-op and on
- **Infection Prevention** – non-invasive
- **Patient Satisfaction** – no sore throats, parents & kids love to be able to take them home too
- **Value Based** – far less expensive than electronic probes

Crystalline® II

Crystalline® W

Crystalline® II, Crystalline® W, and TempAlert™ II

- Bright green bar indicates temperature
- Easy to read
- 2° increments
- Crystalline W features wider bars for even easier readings
- Smaller TempAlert II is more economical

TempAlert™ II

Right Tools in Your Temperature Management Program

Indicators Just Make Sense

Clinically Tested

In the O.R., on the Forehead

- Multiple studies^{1,2,3,4} comparing Crystalline indicators on the forehead vs. properly placed esophageal probes have repeatedly found them to read with +/- 0.5°F with no statistical difference
- Crystalline readings were further found to correlate closely with trend of esophageal readings
- Findings were similar in adults and pedi patients

In the Lab

Independent lab studies^{5,6} tested liquid crystal technology vs. thermistors and thermocouples used in axillary, esophageal and other electronic probes for accuracy and speed

- No difference was found at lower temperatures but at higher temperatures, Crystalline, was found to be more accurate than electronics
- Crystalline was found to respond to changes in temperature more quickly than electronics

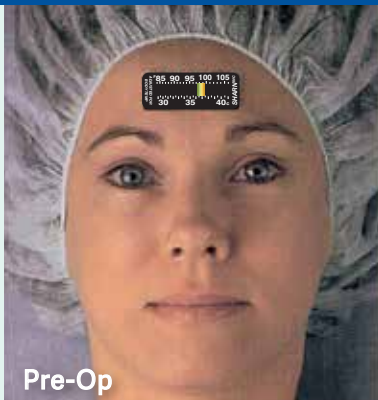

Vs. Other Brands

At U of F,⁷ investigators compared various brands of strips to a control temperature. It was assumed they would all read alike, but Crystalline stood out as clearly more accurate

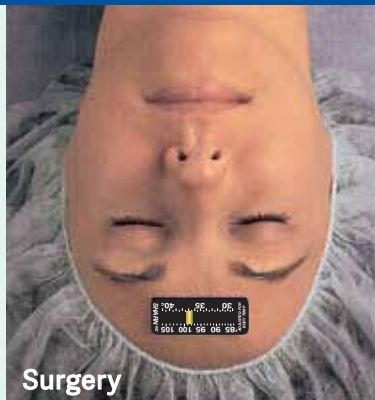

- Only Crystalline was consistently +/- .5°F of the test temperature
- Other brands read anywhere from -2.5° to +5.5°F

^{1,2,3,4,5,6,7} Contact your Sharn representative or visit our website for further study information.

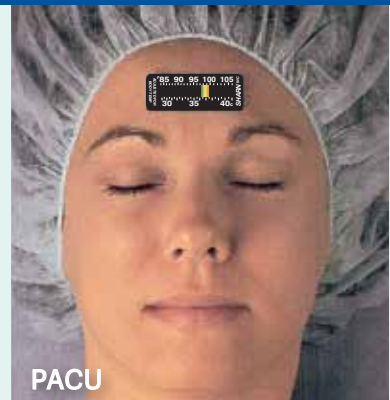

Don't be fooled, not all strips are made to the exact standards of Sharn Temperature Trend Indicators.

Pre-Op

Surgery

PACU

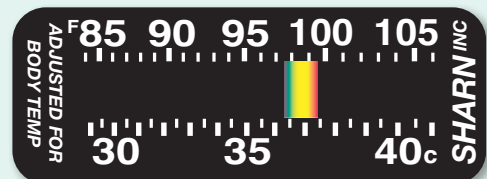

Perioperative monitoring to further ensure your patient's safety!

Crystalline® MLC

Features a trend indicator line that moves as the temperature of the patient changes. Ultra-sensitive liquid crystal technology flows in a single band that allows the indicator line to move and display a most precise reading.

- Continuous moving yellow line
- Easiest and most precise reading
- No color interpretation
- More precise temperature indication

AIRWAY MANAGEMENT

Uncuffed

Endotracheal Tubes

Economical nasoral ET tubes are available uncuffed, cuffed, and reinforced. Cuffed tubes feature a barrel-shaped cuff which distributes pressure against the tracheal wall evenly thus minimizing the risk of necrosis and providing a gentle seal.

- Sterile
- Radio-opaque strip
- Smooth Murphy eye
- Soft tip

Slip-Resistant Bite Block Prevents ET Tube Occlusion

Designed to protect endotracheal tubes when sedated patients bite down, this unique Bite Block utilizes security rings to prevent slipping. The one-piece block is easy to attach and adjust and stays securely in place. The soft block is gentle on patients' teeth, yet strong enough to protect the tube.

Capnoxygen® EtCO₂/O₂ Sampling Mask

Because Cannulas Don't Always Deliver

The Capnoxygen Mask is a consistent means to monitor breathing of a non-intubated patient, allowing sampling of exhaled carbon dioxide from both the mouth and nose while at the same time administering oxygen. The mask is soft and allows form-fitting comfort for the face. The tubing is non-kinkable (star lumen).

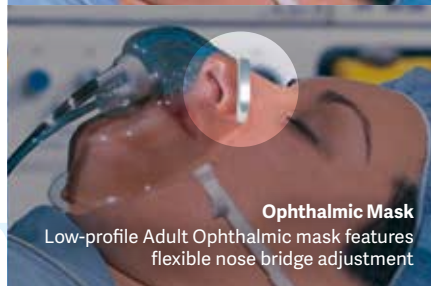

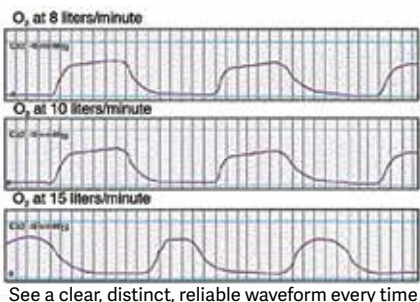

- Soft, form-fitting for comfort
- Simple, fast hook up to CO₂ monitor and oxygen
- Unique bevel tip sample tube to capture CO₂ samples
- Star lumen non-kinking O₂-supply tubing, pre-attached

- Can be used as an O₂ source only

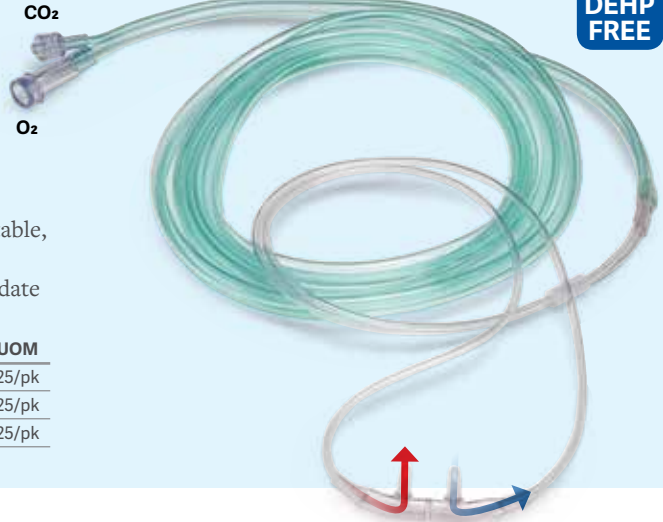

Best option for mouth breathers!

NEW**Affordable. Trusted. Preferred.****Sharn Select****DEHP FREE****Divided EtCO₂ Cannulas**

- Soft, flexible construction reduces pressure on patients' ears and cheeks
- Divided design delivers O₂ through one nare and samples CO₂ through the other
- Provides more accurate end-tidal gas reading
- Tapered nasal prongs and curved face piece for a more comfortable, anatomical fit
- Available with multiple CO₂ sampling line lengths to accommodate room configurations

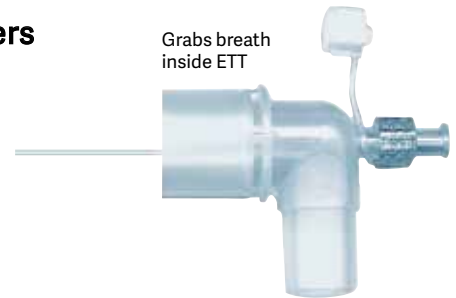

ORDER#	DESCRIPTION	UOM
SH34281	2m O ₂ , 2m CO ₂ • Male Luer	25/pk
SH34282	2m O ₂ , 2m CO ₂ • Female Luer	25/pk
SH34283	3m O ₂ , 3m CO ₂ • Male Luer	25/pk

**Gas Sampling Catheter for Neonates and Shallow Breathers**

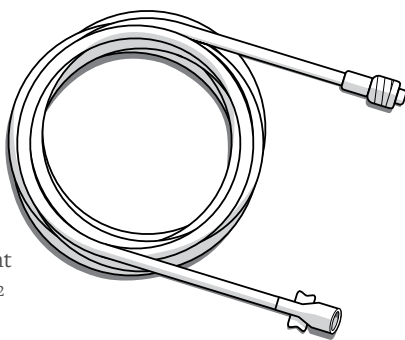

The Gas Sampling Catheter allows sampling within the endotracheal tube, improving the ability to obtain accurate sampling and breath waveforms for patients with low tidal volumes and/or when using high flow anesthesia breathing circuits. The GSC is a simple catheter and luer lock connector that extends through the standard luer port of a gas sampling connector (mask elbow.)

ORDER#	DESCRIPTION	UOM
GSC-10	Catheters	10/pk

Grabs breath inside ETT

**10' Gas Sampling Lines**

- Sampling lines for measurement of end-tidal CO₂
- Economical
- Single-patient use
- Choice of male or female luer for machine fitting

SmartStack™ Premium Nesting IV Stand

New Upgraded Design!

Recently upgraded SmartStack Premium Nesting IV Stand adds inches to the stainless steel pole diameter and 2.3 kilograms to the overall weight. The result is improved stand support and durability. The new pole features an increased bottom tube height of approximately 1.5 meters and extends to just under 2.4 meters and a one-handed height adjustment knob that releases and locks into place quickly and with ease. Saves bedside space and reduces tripping risk compared to traditional stands.

- Patented, space-saving stacking design with taller outer tube
- Four ram-horn hooks (four fixed)
- Large, smooth rolling casters (two locking)
- 100% cast aluminum base
- Easy, one-handed height adjustment
- Powder-coat paint finish
- Four-year warranty
- Wide 61cm base

CASTrGARD™

Innovative CASTrGARD provides an effective, safe, and economical solution to wheel obstructions. It conveniently moves cords and hoses along with your equipment thus avoiding the risks and hassles of wheel obstructions! For anesthesia machines as well as other equipment such as endoscopy carts, portable ultrasounds, etc. One-piece design is easy to put on and take off. No tools required or parts to lose. Provides protection for cables, probes, and valuable equipment. No need to interrupt patient monitoring to move cords or clear obstruction.

Affordable. Trusted. Preferred.

Sharn Select

Water-, Smudge-, and Tear-Proof Sterile Labels

As infection prevention protocols increase, it's important to make sure your labels are compliant with Joint Commission guidelines. SharnSelect sterile labels are water-, smudge-, and tear-proof, making them perfect for use in almost any condition. The custom labels are available with ASTM standardized color-coding or black on white and have residue-free designs for easier, less messy removal.

- 100% waterproof from polyester synthetic material
- Smudge and tear proof
- Compliant with the Joint Commission's Universal Protocol for labeling all medication
- Removable and residue free
- Color-coded or black on white
- Comes in sheets of 10 or 20; order 100 or 300 sheets at a time
- Available with optional sterile pen

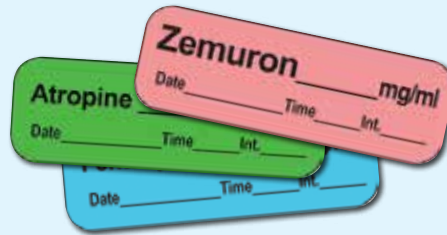

Call your Sharn rep for order information today!

Anesthesia Syringe Labels

Syringe labeling is critical for patient-safety. SharnSelect Pre-Cut Labels and perforated Label Tape feature bold colors and easy-to-read fonts that reduce the opportunity for error. Labels provide space for handwritten information, are colored consistent with ASTM standards, and are compliant with The Joint Commission.

NOMO NAUSEA™ MED+

NEW

Reduce Occurrences of Post-Op and Post-Discharge Nausea and Vomiting (PONV & PDNV)...Naturally!

- Safe, fast acting, non-drowsy
- Virtually no side effects
- Excellent adjunct to pharmaceutical interventions
- Contains highest concentration of essential peppermint oil
- Send home with patients for continued relief and overall satisfaction
- Can be used prophylactically or as a rescue anti-emetic
- For arm/wrist surgery or patients with circulatory compromise in one limb simply move NoMo Med+ to the other limb so there is no conflict
- Most patients require only one band to experience relief

The acupressure ball targets the median nerve at the P6 pressure point to release beta endorphins in the brain for nausea relief

Natural, peppermint aromatherapy helps prevent vomiting by regulating breathing, increasing gastric motility, and decreasing colonic spasms

Safely Pierce Unit Segment

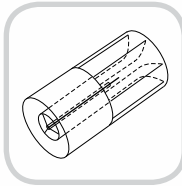

The Hematype is a low-cost solution to a dangerous problem in blood banks. Normally, to type or crossmatch blood samples, a technologist removes a flexible segment of tubing filled with blood from a blood bag, cuts through the tubing with scissors, and squeezes the sample into a glass test tube. This often results in blood spraying onto the lab counter and the technician. Improper cleaning of the scissors between cuttings can also cause contamination of blood samples. The Hematype is a simple plastic device that fits on top of a test tube. Rather than cutting the blood-filled tubing, the technician inserts it into the Hematype, where a needle pierces the tube, and squeezes the sample into the test tube. The Hematype and inserted tubing segment can then be discarded in a biohazard container.

SH9541
Dispensing bin keeps up to 500 segment devices dust-free and accessible

- Segment device works on your existing tube
- Eliminates need for scissors to open segment
- Protects staff from contamination
- Fits over tube for quick, safe, and easy device removal
- Reduces potential of exposure to biohazardous materials

Enclosed piercing device safely punctures segment to extract blood

ORDER#	DESCRIPTION	UOM
SH5497	Hematype Segment Device	500/pk

SH9541	Small • 13cm W x 23cm D x 22cm H	1ea

Reduce Biohazardous Risk with Simple Segment Piercing Device

This affordable blood segment piercing device can help maximize your budget dollars while keeping your staff safe and helping prevent cross-contamination of blood samples.

- Effective alternative to higher-priced devices
- Ribbed exterior for nonslip handling even with gloved hands
- Enclosed steel piercing needle never comes in contact with technician
- Allows for safe dispensing of samples, reducing biohazardous incidents

Tapered end fits wide variety of tubes

ORDER#	DESCRIPTION	UOM
SH1646	TypeSafe™ Segment Sampling Device	500/pk

Insulated Totes Meet Regulations for Safe Medication Transport

An essential addition to your pharmacy, these durable, insulated totes keep contents at consistent, approved temperatures and are perfect for transporting IVs and TPNs.

PROBE COVERS

Sterile, General Purpose Probe Covers

Contains a specially formulated material with scanning properties similar to human tissue. Designed specifically for ultrasound use to easily slide over probes and provide distortion-free imaging. These covers are a recommended alternative for latex-sensitive patients and professionals. Made popular for OB/GYN and sterile scanning procedures.

- Soft, stretchable material is comfortable for patient
- Each box is conveniently packaged with sterile gel and elastic bands for 24 procedures

ORDER#	DESCRIPTION	UOM
SH21702	8.3cm W x 61cm L	24/pk
SH21703	14cm W x 61cm L • 3D End	24/pk

Pull Up Biopsy Probe Cover Set

This larger sized Pull Up™ Biopsy Probe Cover accommodates brackets, guides and biopsy devices. Set includes 14cm x 122cm sterile Pull Up™ Probe Covers, sterile gel, and bands for 24 procedures.

- General purpose
- Sterile

ORDER#	DESCRIPTION	UOM
934468	Pull Up™ Biopsy Probe Cover Set	24/pk

Vascular Access Procedure Cover

Perfect for Bard Site-Rite Ultrasound Systems

A sterile probe cover for use with most vascular access procedures. Each pack includes a clear polyethylene telescopically folded cover, sterile gel, and elastic bands for 24 procedures.

- Vascular
- Sterile

ORDER#	DESCRIPTION	UOM
934433	15.3cm x 122cm	24/pk

Intraoperative Sterile Transducer Cover

Designed for small footprint intraoperative transducers, the high-quality tip provides a snug fit. Extends a sterile field up to 2.4m and protects transducers. Accordion-folded poly transducer cover with attached tip applies easily to transducers in a sterile environment.

- Reduces the risks of cross-contamination
- Accordion-folded poly transducer cover with attached tip

ORDER#	DESCRIPTION	UOM
9146103	15.3cm tapered to 3cm x 244cm	12/pk

Probe Covers

Providing the widest selection of probe and transducer covers to optimally support all your ultrasound needs. Selection includes general purpose, endocavity, sterile & non-sterile, and both latex products and those not made with natural rubber latex.

Each sterile package includes:

- One Pull Up™ cover
- One sterile gel pack
- Two elastic fasteners

Pull Up™ Ultrasound Probe Cover Set

It's the ultimate in easy-to-use, time-saving innovation.

The innovative Pull Up Ultrasound Probe Cover makes for quick and easy loading of an ultrasound probe into a long, sterile probe cover. Unique design allows the user to quickly find the open end of the probe cover. Place the desired amount of gel inside, precisely position the probe into the end, and effortlessly pull the cover over the probe and probe cable.

- Provides protection from cross-contamination
- Helps protect expensive ultrasound probes
- Minimizes clean up by allowing the user to add gel only where necessary
- Saves more time than with conventional covers that require assembly during procedure
- General Purpose, telescopic fold, and sterile
- Includes sterile gel and bands

ORDER#	DESCRIPTION	UOM
SH21710	12.8cm W x 122cm L • 3D End	24/pk

CLEANING BRUSHES

A Few Words on Stainless Steel Brushes...

Stainless steel brushes bend and automatically remove baked-on debris and stains that nylon brushes can't handle.

Helpful TIP

Stainless steel brush tips **WILL NOT HARM** stainless surgical instruments

Helpful TIP

Use it for a day, then toss it away. Start every day with new brushes for better infection control compliance

How to Clean a Cleaning Brush

- 1) Soak brush in a disinfectant solution
- 2) Place in an ultrasonic cleaning machine for several minutes
- 3) When brushes are soiled, discard

Remember:

- 1) Brushes only assist in the cleaning process
- 2) Brushes should only be used in decontamination
- 3) Brushes should never be used ON or IN the human body

Note: Cleaning brushes should be decontaminated at least daily.

Instrument Marking Tape

Clean fingers and a clean instrument allow proper tape application and adhesion. 1 to 1 1/2 times around the instrument and then sterilize. 6.35mm W x 762cm L. Free tape instructions with order.

ORDER#	DESCRIPTION	UOM
SH20336	White	1ea
SH20337	Royal Blue	1ea
SH20338	Kelly Green	1ea
SH20339	Red	1ea
SH20340	Yellow	1ea
SH20341	Purple	1ea
SH20342	Orange	1ea
SH20343	Brown	1ea
SH20344	Black	1ea

How to properly apply:

- 1) Clean fingers with alcohol to remove oils, grease, and dirt
- 2) Wipe tape site with alcohol to remove any lubricant
- 3) Tape length should be only enough to wrap 1 to 1 1/2 times around instrument
- 4) After tape is applied, autoclave instruments. The heat will assist with the bonding of the tape
- 5) Tape the shanks of all instruments. Avoid instrument rings. Wrapping tape will not interfere with the closing of most scissor tips

Helpful TIP
