MR-Conditional, Cordless LED Exam Light

- MR conditional to 7T
- Cordless design eliminates potential tripping hazards and allows for ease of transport
- Rechargeable battery lasts for seven to eight hours per charge
- Five-star caster base with antitip weight
- Recharge time of approximately five hours
- Battery-level indicator
- 3" casters (two locking) for ease of transport
- Nonmagnetic UL and CE-approved battery

NM105180	Battery for MRI Cordless Rechargeable LED Exam Light	1ea	756.00

MR Safe

Applied to an item that poses no known hazards in all MR environments, such as nonconducting, nonmagnetic items.

MR Conditional

An item that has been demonstrated to pose no known hazards in a specified MR environment with specified conditions of use.

MR Unsafe

Any item that is a known threat or poses a hazard in all MR environments. It is not safe in ANY MR environment.

The Only Ferromagnetic Detector Suitable for the MRI Room

- Dual-sensing capabilities for separately screening either ferrous metallic items or any type of metallic item
- Nonmagnetic construction is ideal for operation in Zone IV
- Three modes of operation: high-performance ferrous only, detection around the head and body, or full metal detection around the entire body
- Large search area for quick, accurate screening
- Dual-tone and dual-color display for high-precision pinpointing
- Mitigates the risk of an RF burn occurring in the scanner due to Ferrous or nonferrous metals
- Audible and visual-magnitude alert settings
- Visual signaling combined with the audio provide feedback on the location and position of the object under alarm
- Battery life: >100 hours for all metals; >50 hours for body or head
- MR conditional to 3 Tesla

ITEM	DESCRIPTION	PK	\$
NM106285	PD240CH-Z4 MRI Hand-Held Ferromagnetic Detector 4.7"W x 15.9"L x 1.6"H	1ea	\$8687.00

Address the QA Needs Requiring Medium-Sized Phantom

The Medium ACR MRI phantom was approved for accreditation in mid-2021. It has a 7" diameter cylinder, 6.125" cylinder length, with various fixtures inside including a dinosaur, drilled plate, membrane stack, ramp, resolution block, and S-N chamber. This newly available size enables the capture of images for MRI accreditation and quality control (QC) with the same coil that is used to acquire most clinical brain images. The medium phantom eliminates the extra handling of MR coils in order to conduct required technologist QC.

- Approved by American College of Radiology
- Reference points for nose and chin
- Compatible with all of our Phantom Cradles
- MR conditional to 3 Tesla

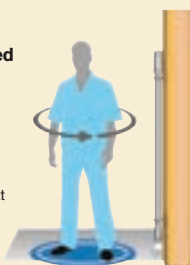

ITEM	DESCRIPTION	PK	\$
NM104683	MRI ACR Phantom, Medium	1ea	\$2338.00

Highly Sensitive, Convenient Ceia Ferromagnetic Detectors

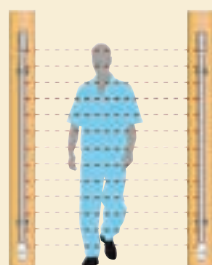

- Preventive detection of ferromagnetic and magnetized object that may cause a "projectile effect" in MRI rooms
- Accurate localization with multizone acoustic and optical alarm signaling
- Durable stainless-steel and high-impact reinforced plastics
- Passive detection with no field emissions
- Record up to 70,000 locally with traceability of the alarms, programming modifications, and diagnostics

Ceia Wall Mounted Ferromagnetic Detector

- Includes:
- Mounting bracket
 - Ethernet cable
 - Patient screening mat (97043 only)

Mobile blanket warmer improves patient comfort

Safe, Lightweight Warmer Improves Patient Satisfaction

Keeping patients warm and comfortable has never been easier with this economical, portable Rx Warmth Blanket Warmer. Using thermostat-controlled heating elements, the easy-to-use Warmer keeps blankets at a toasty 130°F, while its lightweight design makes it easy to tote from room to room or to different areas within your facility.

- Portable warmer keeps blankets at 130°F and is always ready for use
- Ideal for increasing patient satisfaction and comfort
- Handles for easy transportation
- Washable with removable heating elements
- Thermostat-controlled heating elements in the top and bottom
- Holds 60" x 90" blankets

Compliant 30dB Coil Headset

This truly unique headset system features an enhanced and patented design that creates a better fit in tighter coils. Works in conjunction with our unique coil headset plugs that utilizes a pneumatic port to transfer music or speech directly into patients' ear canals while providing 30dB of gradient noise attenuation.

- Uniquely designed for comfort and fit within all coils
- 30dB NRR attenuation both complies with and exceeds ANSI standard minimum requirement of 29dB NRR
- Not made with natural rubber latex

Each headset includes:

- 1 30dB Coil Headset
- 10 pairs of standard size plugs
- 10 pairs of mini size plugs

Noise Guard Headset 29dB

This earmuff headset fits comfortably and securely over the ears, providing a full 29dB Noise Reduction Rating (NRR) to patients during their scan. Soft latex-free muffs are comfortable for patients to wear for extended periods of time and may be used with Large Sanitary Covers for easy cleanability. Tested according to ANSI standards, this headset offers the maximum attenuation available to patients in the MRI environment.

- Ear muff-style headset
- Tested at NRR 29dB
- Compatible with our Large Sanitary Covers (see page 3)

ADPT2ST	3-Prong Screw-Top Adapter	1ea	161.00

Non-Headset

The Non-Headset is designed for the tightest of head coils providing music and communication to the patient during their scan without the use of an actual headset. The Non-Headset has two 1" foam ear muffs which can be positioned right up to the patient's ear in the head coil compressing down to 0.5" but has no headband allowing use in almost any situation. It is not intended or rated to reduce noise and therefore must be used in conjunction with earplugs with a minimum NRR rating of 29 in order to be ANSI compliant.

- Foam ear muffs compress to just 0.5" to allow for use in head coil
- Provides music and communication to patient without use of actual headset
- Not rated for noise reduction; must be used with earplugs rated at NRR 29dB
- Includes one male connector and 4' of tubing

The Ideal Noise-Attenuating Solution for High-Decibel Procedures

Newmatic Medical is the most trusted provider of superior imaging products. We select only the best to offer today's leaders in MRI. Our selection of ear plugs is no exception to that standard of quality.

When you purchase a set of ear plugs from Newmatic Medical, you're choosing to give your patients the best hearing protection available. You're providing patients with a level of quality that store-bought or knock-off ear plugs can't match.

Your job is MR specific. Your equipment is MR specific. Shouldn't your patients' ear plugs be MR specific too?

The Best Sound System for MRI

The high-quality, value-engineered Newmatic MRI Sound System you know and love is now better than ever. Combining the classic design with improved technology, Newmatic is enhancing the MRI experience for both patients and technologists. Designed so that patients and technologists can listen to different music sources at the same time, the System also has dual active headsets that allow patients and companions to both listen to instructions or music.

- Reengineered, improved patient amplifier with AM/FM tuner
- Allows patients and technologists to listen to different music sources at the same time
- Headset has 10' tubing that directly plugs into the transducer for a superior listening experience and enhanced comfort
- Nonheadset is designed for the tightest head coils and can be used in conjunction with earplugs to reach the required 29db NRR
- Nonheadset has two 1" foam ear muffs that can be positioned right up to patients' ears in the head coil, doubling as a positioning aid
- Dual active headsets allow both patients and companions to wear headsets and listen to the same source
- Helps reduce anxiety during MRI scans and improve overall patient satisfaction
- iPad mini comes ready for use, preloaded with music apps and an album
- RF filters help ensure artifact-free scanning
- Easy to install, especially when updating an older Newmatic Medical MRI Full Sound System
- Compatible with other tablets and smartphones
- One-year warranty

Antimicrobial Positioning Pads

The patient comfort technology featured in these Antimicrobial Positioning Pads was developed over a two-year period in close cooperation with leading imaging centers to maximize patient comfort as well as conform to the specific requirements for compatibility and safety. It uses a heat-sensitive viscoelastic pressure managing material originally developed in conjunction with NASA that molds to the patient's exact body shape and contours to evenly distribute weight and pressure. The ultra-strong cover with durable nylon seams cleans easily with any standard hospital disinfectant. (No bleach products)

"Comfortably secure subjects' heads for scanning, and greatly reduce the amount of data lost to motion artifacts. More importantly, the pillows increase comfort and encourage subjects to adopt a relaxed posture when participating in functional MRI scans."

-Doctor of Behavioral Research Unit at Alberta Children's Hospital Research Institute for Child and Maternal Health

Vinyl
Puncture resistant system with antibacterial qualities suitable for repeated use

Provide Comfort and Accuracy During Neuroimaging Studies

Developed by an experienced radiologic technologist, doctor of psychology, and renowned neuroimaging researcher. This innovative Neuroimaging Support System provides a solution to collecting quality image data, with no movement. Bite bars, inflatable bead bags, head and neck braces, and molded masks are a thing of the past with the Neuroimaging Support System. Designed for multiple patient use within hospital and clinical outpatient MRI suites.

- Optimize brain images for precise, neuroradiologic diagnosis
- High-grade memory foam ensures maximum comfort, minimal movement, and eliminates repeat testing
- Vinyl or durable healthcare fabric coatings resist puncture or tearing
- Coatings provide impenetrable barrier to viruses and bacteria
- Artifact free in all imaging applications
- Able to withstand repeated cleaning with hospital-grade disinfectant

Positioning for Fewer Repeat Exams

Pearltec MULTIPAD Positioning System is pure, positioning innovation. This two-cushion system has been carefully designed to aid in the reduction of repeat exams, often caused by inadequate positioners that produce poor image quality. The system utilizes a unique combination of soft, movable polystyrene pearls and inflatable air chambers to reduce patient movement and minimize motion artifacts. Increasing air levels within the chambers via the attached hand pump creates a customized fit for any patient, part of the body, and coil-specific application. All available models feature two inflating cushions and built-in hand pump.

- Patented cushioning technology allows provider to custom fit positioning to each patient
- Creates optimized, stable positioning that minimizes motion artifacts in CT and MRI exams
- Get high-quality images that reduce the need to re-exam
- Replace conventional positioners with versatile Pearltec to simplify procedures and save time
- Ensure compliance of infection prevention requirements with add-on, single-use hygienic covers
- ISO 9001:2008 and EN ISO 13485:2012 certified
- MR conditional to 3 Tesla

**50% Reduction
of repeat exams in
one year of use¹**

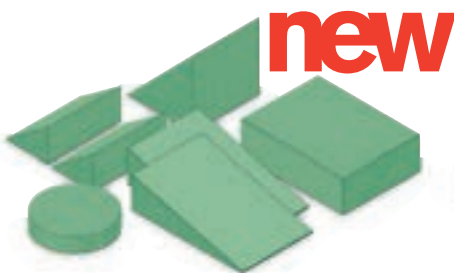

**80-90% Motion
artifact reduction¹**

**30% Less time

Arm Support Strap Minimizes Patient Fatigue

Patient fatigue can often result in procedure interruption. The Arm Support Strap is designed to reduce patient fatigue by immobilizing and supporting the arms at patient's side, which is especially important for procedures performed on narrow tables like SPECT, CT, or MRI.

- Fastening straps wrap around both the table and the patient
- Construction offers no attenuation to the image
- 12" width is wide enough to comfortably support weight
- Easy to clean

ITEM	DESCRIPTION	PK	\$
213154	Arm Support Strap • Royal Blue	1 ea	\$250.00

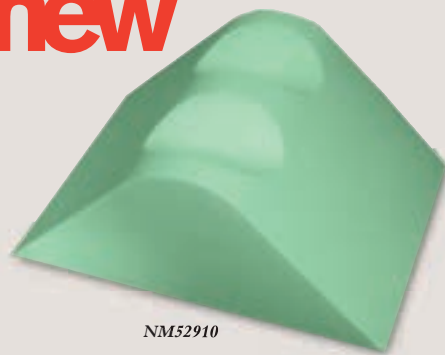

The Hugger™

This MR-safe immobilizer results from extensive development and testing of child immobilization. With proper anatomical design incorporated in the use of Techni-Foam, the Hugger achieves a womb-like warmth and security, which hugs rather than confines, an effect that pacifies the child, resulting in maximum cooperation. All nonferrous materials used in construction. Replacement parts available.

Disposable Laryngoscope Blades

The disposable laryngoscope blades feature the blade shape of the world's best-selling integral Fiber-Optic blade. With proper use the disposable blade avoids cross-infection from one patient to the next.

- Extreme torsional stiffness, practically unbreakable
- Hygienic and safe
- Blade shape optimized to ease the passage of the tube
- Optimum light transmission by oversize light guide
- Extremely bright light from the XHL Xenon Halogen bulb in the handle
- Patient friendly, with reduced risk of injury or damage to teeth
- Blades do not "freeze" or stick to the tongue at low temperatures
- Blades conform to the rigorous ISO 7376 (green standard)
- Cost-effective compared with most reusable systems
- MR conditional to 3 Tesla

Hyper Bright MR-Conditional Laryngoscope Kits

These specialty Laryngoscope Kits with Hyper LED lights provide a unique integration of safety and affordability for performing intubations within the MRI suite. Superior bright white lamps are long lasting and cost effective.

NM17418

- Affordable solutions for safe intubations within the MRI suite
- Long-life LED lamps reduce budget burden, eliminating costs of replacement lamps
- Industry-superior bright-white, Hyper LED lights outlast alternative options
- Distinctly identifiable color guides on blades and handles reduce risk of incompatible equipment entering MRI suite
- Designed to ISO green specification
- Tested and demonstrated to be MR-Conditional for magnetic field interactions at 3-Tesla with highest spatial gradient field of 720 gauss/cm or less

MAGLIFE Serenity

The MAGLIFE Serenity guarantees highest ECG quality during magnetic resonance imaging scanning—even under the strongest gradient influence. The MAGLIFE Serenity is specifically developed to monitor all vital parameters during anesthesia of adults, children, and neonates in an MRI imaging environment.

- Highest ECG quality under strongest gradient influence
- Several gating outputs for optimal MRI triggering
- Core and skin temperature measurement by optical sensor
- State-of-the-art gas analysis during anaesthesia
- Network compatibility (wireless LAN, fibre cable, LAN)
- Safe penetration of the Faraday cage
- Accessories suitable for MRI

MR Transport Gurney with Optional Hand Crank

This transport gurney boasts a generous 600lb weight capacity and convenient 22" x 31" storage tray below. The manual crank feature allows the operator to easily raise and lower the fowler backrest, adjusting from 0°–75°, alleviating the potential for back and hand injuries while trying to manually lift or lower a bariatric patient. Nonmagnetic, stainless-steel construction makes it ideal for MRI. Comes standard with four 4.75" locking casters, grounding chain, storage tray, and forest green 2.5" pad. Nonmarring bumper protects on all sides. Flip-down side rails provide easy accessibility. Optional IV pole and O₂ holder also available. MR Conditional to 3-Tesla.

- Nonmagnetic stainless steel
- Fowler backrest adjusts from 0°–75°
- Available with or without hand crank
- 2.5" thick pad is 77"L x 23"W
- Load capacity: 600lb
- Flip-down side rails

Reverse braking casters lock
and become immobile by
applying weight to the chair.

Sonographer Stool Increases Comfort and Range of Motion

Don't sacrifice comfort or personal safety to obtain the optimal image. The Ergonomic Stool allows the sonographer to bend, stretch, and move more freely between the exam table and the imaging system—while providing additional support to reduce the stress of repetitive motion. It reduces fatigue with additional support whether sitting forward, sideways, or backwards—and still allows the maintenance of a wide reach.

- Contoured saddle-style seat
- Adjustable seat allows for increased flexibility, range of motion, and reach
- Sit in the reverse position in the chair for increased ergonomic benefits
- Five-star base with wheels and sloping footplates to enhance stability and mobility

Newmatic Efficiency Bins Help You Find Critical Supplies Quickly

Increase throughput, reduce inventory costs, create extra workspace, and sort and separate your everyday supplies with Organizer Bins. Available in multiple sizes and colors for total organization.

- Heavy-duty, industrial-grade polymer bins are virtually unbreakable
- Stack or hang on a wall panel or rail
- Multiple sizes to accommodate your storage needs
- Color-code by procedure or department
- Sturdy, one-piece construction is water-, rust-, and corrosion-proof
- Autoclavable up to 250°F

*Lots of uses
for these bins!*

I manage a 32 physician practice of radiologists who like their Keurig coffee maker. We have lots of individual preferences and these bins separate all the K-cups to keep them neat and accessible. They stack well, don't fall over and hold a lot.

The docs love them!

Kathy, IA

Versatile, Dust-Free Storage

Create a custom supply station with bin units that stack on countertops or mount on walls. Each bin moves independently, has an integrated handle, and tips out to a wide 45° angle. Dust-free storage reduces contaminants and soil buildup.

- Durable construction for years of use
- Easy access improves workflow
- Bins are removable for easy cleaning and refilling

MRI Mobile Exam Light

This unique exam light is designed for use in any MRI facility. Made of durable, nonmagnetic materials, this mobile light is ideal for imaging centers, radiology departments, and CAT/PET Scan labs and clinics.

- Powerful 50W halogen light source is 4,300 footcandles
- Mobile caster base with easy-glide wheels
- 30' cord extends to enclosed wall-mounted transformer
- Weighted base for added stability
- Vented lamp shade with special reflector minimizes heat output
- Adjustable jointed arm and swivel-joint lamp head allow for easy vertical and horizontal positioning with quick-adjust handle
- 38.5" articulating arm
- 43.3" pole height
- 15.8lb

Increase Patient Satisfaction in Your Dressing Rooms

Provide a bright, comfortable area for your changing patients with increased privacy in various configurations with straight or curved "L" shape options available. Curtains feature antimicrobial finish, specifically designed to inhibit the growth of bacteria on the fabric.

- Washable, antimicrobial finish
- Track is intended to be screwed directly into ceiling without requiring mounting brackets
- Curtains generally sized 10% wider than track length
- Curtains finish 12"–15" above floor to provide both privacy and cleaning accessibility
- 100% inherently flame-retardant material
- Passes NFPA 701 small scale Fire Retardant Test

Curtains are fabricated with 20" white mesh at the heading with grommets spaced every 6"

ITEM	DESCRIPTION	PK	\$

A Better System for MRI Cleaning

Clean Bores and Gantries Without Losing Scan Time

Finally, hospitals and clinics will be able to easily clean between patients without losing valuable scanning time. The MRI Cleaning Wand reaches inside the MRI magnet bore or CT Scan gantry to clean and disinfect those difficult-to-reach places in seconds. Once the area of interest has been cleaned and disinfected, simply eject the disposable pad without touching it with your hands, eliminating the risk of contamination. The disposable pads can be used with any spray disinfectant or cleaning solution.

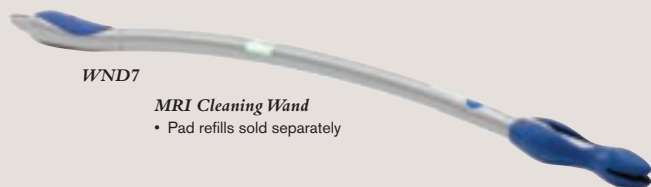

- Nonmagnetic tool designed for mild cleaning and disinfecting
- Recommended for MRI, PET, CT, x-ray units, or any radiology equipment where patients are routinely scanned
- Disposable pads can be used with any spray disinfectant or cleaning solution

ITEM	DESCRIPTION	PK	\$
NM16816	MRI Clipboard 9"W x 1.25"D x 12.25"H	1ea	\$25.00

MRI Stop Sign

More often than not, the only safeguard to prevent the entry of potentially dangerous metallic objects into the MRI environment is a warning sign placed on the door of the magnet room. The main problem with this is that the door is typically left open, so the sign is not visible upon entering the room. The MRI Stop Sign is a cafe-style door, that is always closed, so the sign is always readily viewable by people entering the room. The sign swings in and out and returns to a closed position every time it is used. Constructed of an opaque red polymer with non-magnetic hinges, the sign is 42" in diameter and fits a standard 48" door opening. The MRI Stop Sign can be customized to fit most door sizes.

- Cafe-style door is always closed so the sign is always viewable
- Swings in and out and returns to closed position

MRI Zone Sign General Diagram

A clearly labeled sign to define where each MRI Zone is at your facility. Created in a general format to work at any MRI facility or hospital, this sign simply defines each of the four MR Zones, and who is allowed and restricted in each Zone. Perfect to post in waiting rooms to educate patients and their caretakers, in break rooms as a reminder to staff, and in corridors between transition and restricted-access areas. Sign is constructed of 1mm PVC plastic for durability with high-tack double-back sticky tape already mounted for easy hanging.

ITEM	DESCRIPTION	PK	\$
ZSGD	MR Zone Sign General Diagram • 18"W x 12"H	1ea	\$52.00

LED Wall Sign

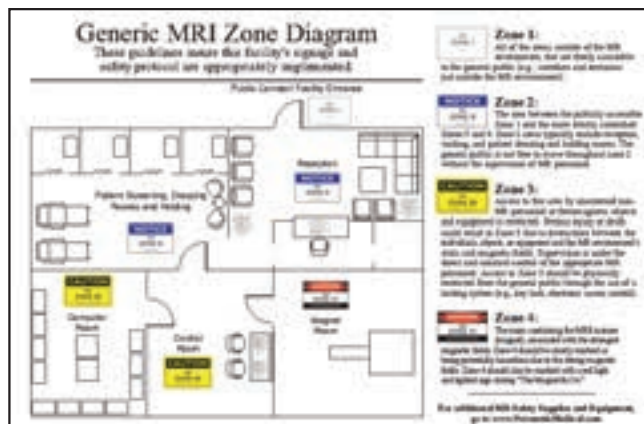

Now featuring long-life LED lights for approximately 25,000 hours of worry-free maintenance. The light-up wall sign is red with white lettering, stating "Magnet Always On." Hard-wired with battery back-up. One-sided wall mount and two-sided ceiling mount available.

- Long-life LED lights provide approximately 25,000 hours
- Hard wired with battery backup

The Latest Advancement in Pre-Screening Technology for MRI Safety

The FerrAlert™ Solo is the smallest, lightest pre-screening ferromagnetic detector available. It is highly sensitive and features the patented technology of the FerrAlert Halo system. When close to the detector, six green lights turn on, indicating the FerrAlert is ready to scan. If any ferromagnetic hazard is detected, the green lights turn off, a short audio alert sounds, and the amber detecting lights flash at the location of the ferromagnetic hazard.

- Accurately and quickly locates ferrous hazards anywhere on the body
- Twelve sensors for uniform sensitivity
- No-touch activation
- Consistent, simple, and unambiguous operation
- Space-saving design is easy to install near any outlet

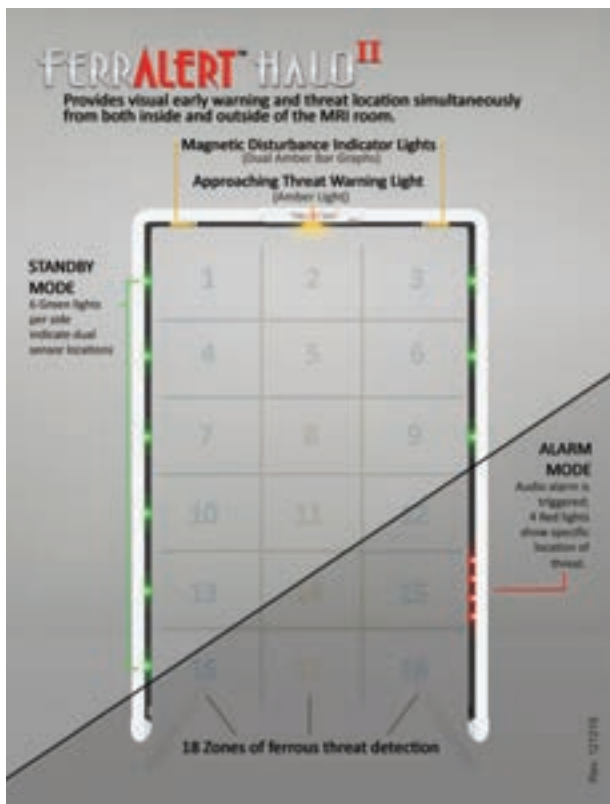

ITEM	DESCRIPTION	PK	\$
NM12952	FerrAlert™ Solo • 2"W x 2.5"D x 86.25"H	1ea	\$17,992.00

Four amber lights flash at height of ferromagnetic hazard

Adjustable audio alert volume

Eliminates need for invasive pat-down searches or handheld detectors

The Next Generation FerrAlert™ Metal Detection System

FerrAlert Halo II provides the latest advancement in ferromagnetic detection (FMD) for MRI safety. Recognized as the most accurate FMD for MRI, the Halo II Entry system utilizes FerrAlert patented technology to provide precise, reliable detection of ferromagnetic objects.

- Reduces alarm fatigue by sensing the direction of personnel and not sounding when ferromagnetic objects exit the MRI room
- Instantly pinpoints location of ferromagnetic object
- Intelligent visual advanced warning
- Uses 24 sensors to ensure uniform sensitivity and detection reliability
- Patented technology suppresses false warnings
- Visible inside and outside the MRI room

ITEM	DESCRIPTION	PK	\$
NM17479	FerrAlert™ Halo II Plus (H22+)	1ea	\$34,366.00

MRI Test Magnet

Handheld Metal Detector

- Three modes of operation allow for high-performance ferrous only detection around the head and body or full metal detection around the body
- Capable of separately screening for both ferrous and nonferrous metallic items
- Eliminates risks of dislocation, torsion, overheating, or induction of electrical current
- Audible, silent-vibration, and visual-magnitude alert settings
- Visual signaling combined with the audio provide feedback on the extent of the alarm
- Personalize the interface, energy-saving mode, and sensitivity of the three operational modes
- Refine the analysis capabilities based on specific patient needs

ITEM	DESCRIPTION	PK	\$

Create Precise Reference Points Without Spray Artifacts

Disposable, cost-effective Radiopaque Markers offer precision and convenience in a wide variety of applications. They feature a flat design that prevents indentation and artifacts.

"When we first saw them, they looked so simple, just lines on paper, but we were amazed at how well they show up. We've not found anything else that works as well."
Pam, Radiation Therapist

- Can be used to identify any point of interest, including masses, scar tissue, moles, and birthmarks
- Flat design prevents tissue indentation
- Clear adhesive backing aids in precise marker placement
- Works for CT, x-ray, fluoroscopy, and angiography
- Double pull tabs permit easy application and removal
- Disposable

Refined Quality Assurance Tools for Advanced Imaging Systems

Keep your facility's equipment calibrated, and pass daily quality assurance tests. Ensure your imaging systems' hardware and software are running at optimal levels and within federal regulations.

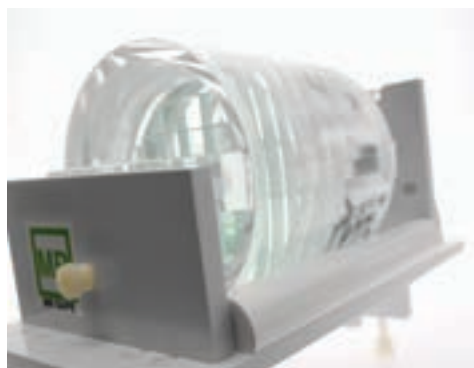

ACR MRI Phantom

The ACR MRI Phantom is an 8" (203.2 mm) diameter cylinder, 6.82" (173.40 mm) tall with various fixtures inside, including a plate, cylinders, and other points of interest. Marked with reference points for nose and chin. The Phantom is approved by the American College of Radiology and is compatible with the ACR Phantom Cradles.

- Approved by American College of Radiology and for Joint Commission Accreditation use
- Reference points for nose and chin
- Compatible with all of our Phantom Cradles
- Includes small all-plastic level

ITEM	DESCRIPTION	PK	\$
ACRMRP	ACR MRI Phantom	1ea	\$2391.00

MRI Phantom Cradles for Use with ACR Phantom

Consistently and precisely positions the ACR Phantom in the head coil in less than a minute, saving valuable MRI time—approximately 30 minutes per week/26 hours per year. They also save the MRI technologist the frustration of positioning the ACR phantom without a compatible cradle. Features multiple adjustable set screws.

Phantom Refill Set

Got bubbles? The Refill Set for the ACR phantom includes everything you need to easily remove air bubbles and top off the ACR phantom. This saves you time and money by eliminating expensive overnight shipping costs to ship the phantom back and forth, and the cost of a "top off" service fee. The Refill Set allows for multiple uses so you have a troublefree solution the next time your phantom gets an air bubble.

ITEM	DESCRIPTION	PK	\$
BUBL	Phantom Refill Set	1ea	\$349.00

ACR MRI Phantom for Smaller Machines

The Small ACR MRI Phantom is a short, hollow cylinder of acrylic plastic closed at both ends. The inside length and inside diameter are both 100mm. It is filled with a solution of nickel chloride and sodium chloride.

- Designed for use in small machines, such as those for extremity and breast imaging
- Approved by American College of Radiology
- 4.5" diameter; 4.5" cylinder length; 5.375" overall length with mounting bars
- Includes small, all-plastic level
- Does not require a phantom cradle; fits most standard knee coils

ITEM	DESCRIPTION	PK	\$
NM12951	Small ACR MRI Phantom with All-Plastic Level • 4.5"Dia	1ea	\$1847.00

Handheld Metal Detector

- Three modes of operation allow for high-performance ferrous only detection around the head and body or full metal detection around the body
- Capable of separately screening for both ferrous and nonferrous metallic items
- Eliminates risks of dislocation, torsion, overheating, or induction of electrical current
- Audible, silent-vibration, and visual-magnitude alert settings

ITEM	DESCRIPTION	PK	\$
NM27334	PD240CH Handheld Metal Detector	1ea	\$6516.00

For more information, see pg 55

Durable PVC MRI Zone Signs

Called for by the "White Paper on MR Safety and MR Safe Practice Guidelines" from the American College of Radiology, these signs provide visible safeguards and fail-safe boundaries to help protect patients, attending healthcare professionals and anyone else who occasionally enters the magnetic field of MR scanners (such as housekeeping or security personnel).

ITEM	DESCRIPTION	PK	\$
MRI Zone Sign 12"W x 8"H			
ZONE1	Zone I	1ea	\$50.00
ZONE2	Zone II	1ea	47.00
ZONE3	Zone III	1ea	50.00
ZONE4	Zone IV	1ea	50.00
ZONEC	Combo Pack • 1 each of all 4 signs	1pk	170.00

For more information, see pg 51

Slimline Noise Guard Headset

- Fits into most head coils
- Provides 12dB of noise attenuation; must be used with earplugs to reach 29dB attenuation
- Coded version is compatible with most sound systems
- Cordless version provides noise protection only
- Standard male connector

ITEM	DESCRIPTION	PK	\$
SNGHS	Slimline Noise Guard Headset 1ea		\$404.00
NCSNGHS	No-Cord Slimline Noise Guard Headset	1ea	115.00
Sanitary Covers			
SCL	Large • White	1000/pk	149.00

The First Dedicated Advanced Patient Pad Specifically Designed to Protect Patients from Thermal Injuries During MRI

- Protects patient by preventing contact with the bore of the MRI machine
- Helps prevent thermal injury
- Easy to use
- A must for 3T MRI

ITEM	DESCRIPTION	PK	\$
NM12945	MRI Patient Protection Pad 29"W x 14"L x 0.625"H	2/pk	\$731.00

For more information, see pg 11

NM13136

Provide Comfort and Accuracy During Neuroimaging Studies

- Optimize brain images for precise, neuroradiologic diagnosis
- High-grade memory foam ensures maximum comfort, minimal movement, and eliminates repeat testing

ITEM	DESCRIPTION	PK	\$
NM13136	12-Piece Neuroimaging Support System Vinyl	1ea	\$1523.00

For more information, see pg 11

The Only Dispenser Built for Slim Profile Glove Boxes

- Fits most manufacturers' slim boxes
- Divided for independent box exchanges
- Various mounting options to fit your needs
- Large front opening for ease of dispensing

ITEM	DESCRIPTION	PK	\$
NM14101	Single 10.187"W x 3.125"D x 5.562"H	1ea	\$59.00
NM14102	Double 10.187"W x 3.125"D x 11.124"H	1ea	85.00
NM14103	Triple 10.187"W x 3.125"D x 16.686"H	1ea	89.00
NM14104	Quad 10.187"W x 3.125"D x 21.124"H	1ea	109.00
NM14105	Premium Quad 21.125"W x 3.125"D x 11.124"H	1ea	119.00

See page 48 for additional options.

The Best Sound System for MRI

The high-quality, value-engineered Newmatic MRI Sound System 2.0 you know and love is now better than ever. Combining the classic design with improved technology, Newmatic is enhancing the MRI experience for both patients and technologists. Designed so that patients and technologists can listen to different music sources at the same time, the System also has dual active headsets that allow patients and companions to both listen to instructions or music.

new Newmatic MRI Sound System 2.0
