Insight® Ergo Phlebotomy Cart with Tracking Caster

108687, 108687E

Enhance Maneuverability and Reduce User Fatigue During Long Shifts

Effortless Mobility: The Insight Phlebotomy Cart, equipped with a precision tracking caster, glides smoothly through hospital corridors, navigates tight spaces with ease, and crosses thresholds effortlessly. It delivers the modular storage options and functionality you need, with enhanced maneuverability that alleviates the physical strain on phlebotomists. When engaged, the tracking caster requires only a fraction of the effort to maneuver. This innovative feature enhances control and tracking, while also reducing drift, twisting, or corrections, making the cart feel more stable and responsive under load.

Intentionally designed with valuable features, including the choice of a key lock or e-lock, Insight carts help enhance efficiency and security compared to performing rounds with just a phlebotomy tray. The large worksurface and purpose-built features help facilitate blood draws, while the durable frame is built to withstand even the busiest phlebotomy departments, giving you a hardworking solution that goes everywhere you do.

Features

- Tracking caster enhances control to reduce draft, twisting or corrections
- Ergonomic handle is ideal for taller users and enables easier maneuverability
- 5" medical-grade casters are durable and move easily and quietly
- Three tilt bins provide quick and easy access to key supplies
- Two built-in glove box holders offer easy access to PPE
- 5 drawers conveniently offer ample storage
- Integrated lip on worksurface prevents items like collection tubes from rolling off
- Modular rail system allows easy height adjustment of accessories
- Key or electronic lock to secure supplies
- Easily clean with soap and water or hospital-grade cleaner
- 1-year limited warranty

Available with Key Lock

Available Models

108687	Key Lock	5 Drawers
108687E	E-Lock	5 Drawers

Materials

Cart Panels: Aluminum Composite Material (ACM)

Cart Frame: aluminum

Worksurface: 0.5" marine grade HDPE

Base: 0.75" marine grade HDPE

Tilt Bins/Door: clear polycarbonate

Ergo Handle: stainless steel

A tracking caster combines both functions: it can switch between swivel and fixed/tracking mode.

STRAIGHT-LINE CONTROL – Keeps carts moving straight when pushed down long corridors.

REDUCED OPERATOR FATIGUE – Staff doesn't have to constantly correct direction; the cart "tracks" with minimal effort.

IMPROVED SAFETY – Prevents carts from veering into walls, equipment, or patients.

EASE OF NAVIGATION – Allows staff to switch between "tracking mode" for hallways and "free swivel" for tight patient rooms or procedure areas.

SMOOTH TRANSPORT – Especially useful for heavier carts and fully loaded carts that need stable, predictable motion.

Exterior Dimensions

	Width	Depth	Height*	Weight
Product	23.5"	17.75"	42.25"	74lb
Shipping	30"	30"	50"	99lb

*Handle Height: 42.25"

Work Surface Height: 37.75"
